CILT INTERNATIONAL

INTERNATIONAL CERTIFICATE IN HALAL SUPPLY CHAIN (LEVEL 3)

Build your knowledge and skills in Halal Supply Chain and get an internationally recognized qualification.

✓ Certified Halal Supply Chain Executive

✓ Accredited by CILT International and recognised by the Department of Islamic Development of Malaysia (JAKIM)

✓ Internationally recognized over a network of 37 CILT and 44 SMIIC member countries

About the Qualification

This certificate is designed to introduce the significance of the halal industry and concept of Halal logistics and supply chain management as well as its importance to accommodate today's market demand. It demonstrates the way how halal supply chain could be implemented particularly in the development of halal supply chain assurance management system including the quality assurance. This course also guides the participants in managing the halal supply chain practices.

The modules have been developed to qualify the participants to be nominated as the professionally competent person as a Halal Executive for logistics companies based on OIC/SMIIC 17 series of standards. A Halal Executive is especially needed to those logistics companies who would like to apply for a halal certification for their transport, warehouse and retail in meeting the need of the customers.

The Standard Metrology Institute for the Islamic Countries (SMIIC) is an institute developing necessary mechanisms for the Organization of Islamic Cooperation (OIC) countries, aims at setting new standards in the Member States and eliminating technical barriers to trade and thus facilitating trade among themselves. SMIIC Member States have put their tremendous efforts and expertise in the SMIIC Technical Committee on Halal Supply Chain (TC 10) to prepare new OIC/SMIIC Standards in Halal supply chain management system.

The halal supply chain links producers of products, goods and/ or cargo with consumers. The pipeline provides assurance that products, goods and/ or cargo delivered from one custodian to another is in accordance with halal requirements, thus preserving the halal integrity of the products, goods and/ or cargo. The halal supply chain has been translated into a set of management system requirements standards which comprise of the following: – Transportation – Warehousing – Retailing.

The followings are the three OIC/SMIIC 17 series of standards:

01
OIC/SMIIC 17-1:2020
Halal Supply Chain Management System
Part 1:
Transportation - General Requirements

02
OIC/SMIIC 17-2:2020
Halal Supply Chain Management System
Part 2:
Warehousing - General Requirements

03
OIC/SMIIC 17-3:2020
Halal Supply Chain Management System
Part 3:
Retailing- General Requirements
