CILT INTERNATIONAL

INTERNATIONAL POSTGRADUATE CERTIFICATE IN HALAL SUPPLY CHAIN

Build your knowledge and skills in Halal Supply Chain and get an international recognised qualification.

✓ Certified Halal Supply Chain Executive from the CILT International

✓ Internationally recognised over 30 CILT and 45 SMIIC member countries

✓ Will be enrolled as Affiliate CILT member
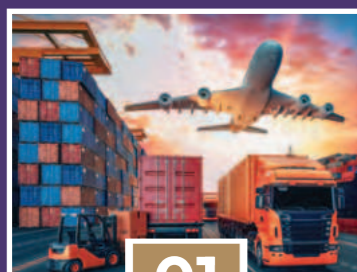

About the Qualification

This certificate is designed to introduce the significance of the halal industry and concept of Halal logistics and supply chain management as well as its importance to accommodate today's market demand. It demonstrates the way how halal supply chain could be implemented particularly in the development of halal supply chain assurance management system including the quality assurance. This course also guides the participants in managing the halal supply chain practices.

The modules have been developed to qualify the participants to be nominated as the professionally competent person as a Halal Executive for logistics companies based on OIC/SMIIC 17 series of standards. A Halal Executive is especially needed to those logistics companies who would like to apply for a halal certification for their transport, warehouse and retail in meeting the need of the customers.

The Standard Metrology Institute for the Islamic Countries (SMIIC) is an institute developing necessary mechanisms for the Organization of Islamic Cooperation (OIC) countries, aims at setting new standards in the Member States and eliminating technical barriers to trade and thus facilitating trade among themselves. SMIIC Member States have put their tremendous efforts and expertise in the SMIIC Technical Committee on Halal Supply Chain (TC 10) to prepare new OIC/SMIIC Standards in Halal supply chain management system.

The halal supply chain links producers of products, goods and/ or cargo with consumers. The pipeline provides assurance that products, goods and/ or cargo delivered from one custodian to another is in accordance with halal requirements, thus preserving the halal integrity of the products, goods and/ or cargo. The halal supply chain has been translated into a set of management system requirements standards which comprise of the following: – Transportation – Warehousing – Retailing.

The followings are the three OIC/SMIIC 17 series of standards:

01
OIC/SMIIC 17-1:2020
Halal Supply Chain Management System
Part 1:
Transportation - General Requirements

02
OIC/SMIIC 17-2:2020
Halal Supply Chain Management System
Part 2:
Warehousing - General Requirements

03
OIC/SMIIC 17-3:2020
Halal Supply Chain Management System
Part 3:
Retailing- General Requirements

Mandatory Units

To achieve this qualification student must complete **four mandatory units**, as detailed below:

HSC-M1
Introduction to Halal Supply Chain and its Implementation

This unit introduces the fundamental principles, significance, and concept of the halal supply chain. It emphasizes the application of Shariah principles and the development of quality assurance measures in halal logistics operations.

HSC-M2
Halal Management System in the Logistics Operations

This unit delivers the main processes of managing the halal supply chain operation and business practices particularly in the core logistics activities i.e., transportation and warehousing as well as retailing activities. It also demonstrates how quality assurance of the halal supply chain is achieved through the identification of halal control points as well as the verification procedures throughout the process.

HSC-M3
Halal Supply Chain Certification

This units introduces the general halal certification process as well as focusing on the preparation of the documentation and procedure for certification.

HSC-M4
Internal Halal Audit Facilitation

is unit demonstrates the facilitation of audit process in accordance with Halal Management System in managing audit program and training implementation.
